V. Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

1. Statement

Novelty (N)	Claims	1-8	YES
	Claims		NO
Inventive step (IS)	Claims	1-8	YES
	Claims		NO
Industrial applicability (IA)	Claims	1-8	YES
	Claims		NO

2. Citations and explanations

1. Reference is made to the following document:

D1: EP 0 681 310 A (NIPPON SIGNAL CO LTD) 8 November 1995

2. Document D1 is considered the closest prior art with respect to the subject matter of **claim 1**. It discloses a safety switching device according to the preamble of claim 1. The subject matter of claim 1 thus differs from this known safety switching device in that the output switch is embedded in the oscillating circuit.

The subject matter of claim 1 is thus novel (PCT Article 33(2)).

The problem to be solved by the present invention can thus be seen as that of making it possible to monitor the operating position of the output switch. The solution to this problem proposed in claim 1 of the present application involves an inventive step for the following reasons (PCT Article 33(3)):

The arrangement requires fewer components, and so production costs can be reduced.
